PREFACE

The '**Health & Family Welfare Statistics in India**' provides health & family welfare performance statistics on the various facets of the Health & Family Welfare Programmes in India upto March, 2015 based on the reports received from States/UTs. Efforts have been made to include data on all demographic, socio-economic, health services and related matters extracted from the results of Population Census 2011, the Sample Registration System (SRS) 2013 and large-scale surveys viz., the National Family and Health Survey (NFHS) - 3 conducted during 2005-06, District Level Household Survey (DLHS)-3 and 4 conducted during 2007-08 and 2012-13, Coverage Evaluation Survey (CES) 2009, Concurrent Evaluation under NRHM conducted during 2009-10 and Annual Health Survey(AHS) Third Round (2012-13). Clinical, Anthropometric and Biological (CAB) component comprising nutrition and anaemia data from DLHS-4 and AHS-3 have also been incorporated in this document, for the first time.

I am sure this document will be of immense use to all those who are engaged in the field of population science, health and family welfare, administration and research. Any suggestions/comments for improving the contents and layout of this publication will be appreciated.

19th October, 2015
